## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-5 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art does not teach or fairly suggest a digital camera comprising: a main image coder for coding a single frame of main image data every time a single picture-taking operation is carried out so as to create a single frame of coded main image data which is reduced in a data amount prior to the taking of the next successive picture; a main image writer for writing the signal frame of coded main image data to an internal memory every time a single coding operation is carried out by the main image coder and a size-reduced image coding for coding the plurality of frames of side-reduced image data after ending the successive picture taking operations, wherein the main image coder adopts a JPEG format as the coding format or codes image data which is in the digital domain as claimed. While it is known in the prior art to process image data after successive picture taking operations are finished (e.g. Nagasaki) as well as creating size-reduced images (e.g. Anderson), the specific combination claimed is not taught or suggested.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
